Before You Claim Social Security

A few things you may want to think about before filing for benefits

Article presented by Jeff Singer, Financial Advisor with W.F. Financial Services.
Jeff joined Mike Canfield and the W.F. Financial team in late 2015.

Financial Services

Whether you want to leave work at 62, 67, or 70, claiming the retirement benefits you are entitled to by federal law is no casual decision. You will want to consider a few key factors first.

How long do you think you will live? If you have a feeling you will live into your nineties, for example, it may be better to claim later. If you start receiving Social Security benefits at or after age 67 (Full Retirement Age), your monthly benefit will be larger than if you had claimed at 62. If you file for benefits at 67 or later, chances are you probably a) worked into your mid-sixties, b) are in fairly good health, c) have sizable retirement savings.

If you sense you might not live into your eighties or you really, really need retirement income, then claiming at or close to 62 might make more sense. If you have an average lifespan, you will, theoretically, receive the average amount of lifetime benefits regardless of when you claim them; the choice comes down to more lifetime payments that are smaller or fewer lifetime payments that are larger. For the record, Social Security's actuaries project the average 65-year-old man living 84.3 years and the average 65-year-old woman living 86.6 years.¹

Will you keep working? You might not want to work too much, for earning too much income can result in your Social Security being withheld or taxed.

Prior to age 66, your benefits may be lessened if your income tops certain limits. In 2017, if you are 62-65 and receive Social Security, \$1 of your benefits will be withheld for every \$2 that you earn above \$16,920. If you receive Social Security and turn 66 this year, then \$1 of your benefits will be withheld for every \$3 that you earn above \$44,880.²

Social Security income may also be taxed above the pro-

gram's "combined income" threshold. ("Combined income" = adjusted gross income + non-taxable interest + 50% of Social Security benefits.) Single filers who have combined incomes from \$25,000-34,000 may have to pay federal income tax on up to 50% of their Social Security benefits, and that also applies to joint filers with combined incomes of \$32,000-44,000. Single filers with combined incomes above \$34,000 and joint filers whose combined incomes surpass \$44,000 may have to pay federal income tax on up to 85% of their Social Security benefits.²

When does your spouse want to file? Timing does matter. For some couples, having the lower-earning spouse collect first may result in greater lifetime benefits for the household.³

Finally, how much in benefits might be coming your way? Visit ssa.gov to find out, and keep in mind that Social Security calculates your monthly benefit using a formula based on your 35 highest-earning years. If you have worked for less than 35 years, Social Security fills in the "blank years" with zeros. If you have, say, just 33 years of work experience, working another couple of years might translate to slightly higher Social Security income.³

Your claiming decision may be one of the major financial decisions of your life. Your choices should be evaluated years in advance, with insight from the financial professional who has helped you plan for retirement.

*Dividend Rate **Annual Percentage Yield, the APY on certificates assumes that dividends remain in the account until maturity. Certificate rates are fixed for the length of the term. A penalty may be imposed for withdrawals before maturity. If your account has an original maturity of one year or less, the penalty will equal three months dividends on the amount withdrawn subject to penalty. If your account has an original maturity of more than one year the penalty will equal six months dividends on the amount withdrawn subject to penalty. The penalty is calculated as a forfeiture of part of the dividends that have been or would be earned on the account. It applies whether or not the dividends have been earned. If the account has not yet earned enough dividends or if the dividend has already been paid, the penalty will be deducted from the principal. In certain circumstances such as the death or incompetence of an owner of this account, the law permits or may require the waiver of the early withdrawal penalty. Other exceptions may also apply; for example, if the certificate is part of an IRA or other tax-deferred savings plan.

Central One is excited to be celebrating International Credit Union Day on October 19th. We encourage all of our members to get engaged, share their experiences and celebrate how credit unions and financial cooperatives have made an impact on their life choices. Please share your experiences with us at ilovecentralone@centralfcu.com

GO GREEN with eStatements

Enjoy the benefits and convenience of e-statements while helping the environment. Sign up for e-statements and find out how convenient it is to have access to your account statements at any time with just a few clicks.

Benefits of e-Statements

- **Save time** – e-statements are delivered to you faster than paper statements including your tax forms
- **Convenience** – access to all of your Central One statements online - anytime or anywhere. Choose how you want to be notified: text message or email
- **Security** – secure sign-on protects your valuable information and you don't need to worry about lost or stolen mail
- **Efficiency** – all of your statements are located in one place allowing you to print statements or check images
- **Access** – all statements are available for 24 months online

Here's How

- **Step 1** – Login to your Online Banking Account and click Online Services
- **Step 2** – Choose estatements
- **Step 3** – Complete and agree to the electronic statement disclosure and agreement...it's that easy!

Fast • Easy • Secure

Always Available
