

# Novel Coronavirus Information

## What do we know?

Much is still unknown about it, but we are monitoring it. It is considered a “public emergency of international concern”, it’s spreading rapidly, and currently there is no vaccine against it.

### Symptoms

They range from little to severe symptoms, and may appear between 2 and 14 days.

**Most common symptoms include:** Fever, cough, and shortness of breath

### Prevention

Wash hands often with soap and water. Use alcohol based hand sanitizer. Avoid touching eyes, nose and mouth with unwashed hands. Avoid close contact with people who are sick. Cover your mouth/nose with tissue when coughing or sneezing. Clean/disinfect frequently touched objects and surfaces.

### Treatment

There is no specific antiviral treatment recommended.

If you experience any symptoms, seek medical attention immediately.
