

BUDGET

David is going shopping for snacks to take on a school trip. His mom gave him a budget of \$5. Here are some of the choices David is considering:

Snack bag: \$0.40
 Gatorade: \$1.50
 Chocolate bar: \$1.00
 Skittles: \$0.75
 Twizzlers: \$1.25

Can you help David make his choices while sticking to his budget?

1) If David chooses to buy a bottle of Gatorade, a chocolate bar and Skittles, how many snack bags can he still afford to buy?

- a. 4 bags
- b. 3 bags
- c. 2 bags
- d. 5 bags

2) If David buys two snack bags, a bottle of Gatorade, a chocolate bar and Twizzlers, how much money will he have left over?

- a. \$0.45
- b. \$0.50
- c. \$1.00
- d. \$0.00

3) David chose to buy three snack bags, a bottle of Gatorade, two chocolate bars and Skittles. However, when he brought them to the register to pay, he found that his total was over the \$5 budget. Which of the following can he put back to keep his total under \$5?

- a. A snack bag
- b. The Skittles

4) **THINKING CAP:** Why do you think David's mom gave him a budget for his shopping? How is the budget helping him make smarter choices? _____
